

I would strongly urge consideration of Federal "No-Call-List" act or regulation to control unwanted and intrusive "cold-call" telemarketing as is presently in force in the Commonwealth of Pennsylvania. Even with such an act in force in the Commonwealth, I still personally recieve four to ten such calls per week from telemarketers located in places outside the Commonwealth, often pre-recorded calls to which there is no viable recourse at present- which disrupt my day (I work at home) and lessen the quality-of-life for myself andmy family.
